ROAD ASSESSMENTS FOR CITY OF SPOKANE

Inland Professional Title has been informed by the Spokane City Engineer's office some information regarding "paving dirt roads in the City of Spokane".

Spokane City Engineer's office has indicated that:

- Any property with a dirt road in front or has access to their property by a dirt road may have a **Proposed Road Improvement Assessment** in process.
- The **Proposed Road Improvement** district information is not available on the computers, so the title companies are unable to research each parcel and the title companies do not have knowledge if the road is paved or not.

If you are listing or working with a buyer on a house where the road is not paved, you may want to check with the **Spokane City Engineer's office at 509-625-6700** to find the assessment status.

If you have further questions, please feel free to contact any one of Inland Professional Title's Title Officers or you may contact your Sales Representative.
